

6803 MULTILEC INDUSTRIAL LUBRICANT
GINEBRA SAN MIGUEL, INCORPORATED
Comp Air Broomwade Screw Compressor
6000 Series Serial no A2436-391

CUSTOMER TESTIMONIALS

Customer Profile

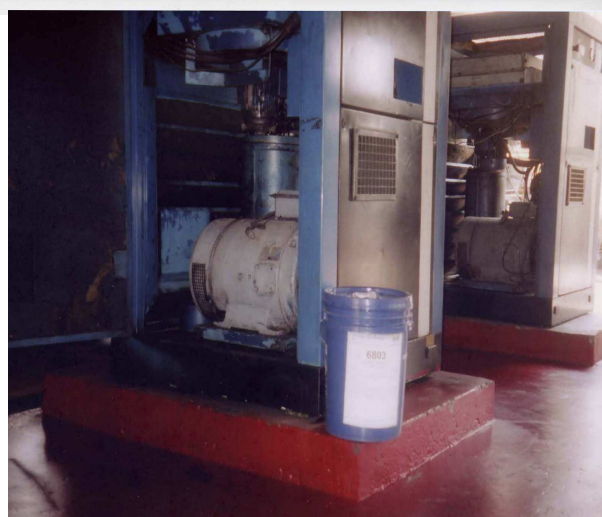

Ginebra San Miguel is the largest – selling gin in the world and the first ever Philippine gin. GSM has sight on becoming a diversified alcohol – based beverage company in the Asian region.

Application

Ginebra san Miguel uses four (4) units CompAir Broomwade Screw Air Compressor 6000 series. These air compressors are alternated to run at different times averaging well above 8 hours per day.

Area of Interest

The Engineering Manager and the Facilities Supervisor were looking for air compressor oil that could extend the drain interval and lower the operating temperature. The commercial grade oil accumulates carbon deposits and sludge and have to be drained every 3-4 months. This would result on unexpected downtime because they did not know when the oil would oxidize and fail.

LE Solution

During our seminar on Industrial Lubrication on September 27, 2003, Lubrication Engineers oil Analysis Program was introduced to monitor the condition of the oil as well as the equipment. The Facilities Supervisor agreed to try LE 6803 Multilec Industrial Oil in one of their air compressors. He was very interested to see if LE 6803 could perform better in the harsh environment like theirs.

Customer Cost Savings

LE 6803 Multilec Industrial Oil was filled in one (1) unit air compressor. Operating temperature was reduced to 10-12°F and the result of the oil analysis showed that all data are normal and no indication of significant wear. They realized they could extend the drain interval to one (1) year. They are now using LE 6803 Multilec Industrial Oil in all CompAir Broomwade Screw Air Compressor.

Other Product Used

LE 1250 Almasol High temperature Grease
LE 452 Almasol Chain and Cable Lubricant
LE 1233 Almatek General Purpose Grease
LE 4025 Quinplex Food Machinery Lubricant
